MDM

- What does MDM mean to you?

MDM LANDSCAPE

5

MDM**SOLUTION**BENEFITS

6

Employer Benefits

- Increase productivity
- Reduce business security risks
- Boost employee satisfaction and morale
- Gain visibility

CAPABILITIES **AND** USE CASES

7

What can be done with
MDM?

Enable companies to:

- Monitor Device Inventory
- Ensure Device and Data Security
- Enforce Configurations and Limit Features
- Monitor and Manage Application Inventory
- Manage device, user
- Support BYOD

CMDM**ENROLLMENT**

8

How can I enroll devices?

Enrollment Capabilities:

- Over the Air (OTA) enrollment without physical access
- One time passwords or Active Directory/LDAP
- Classify employee (BYOD) and corporate owned devices
- Immediately control devices with default profiles enforced during enrollment

CMDM CONFIGURATION

9

How do I configure
devices?

Configuration includes:

- Create enterprise policies to control devices
- Deploy corporate configurations to all of your devices (such as Wi-Fi, Email, VPN, etc.)
 - *Samsung KNOX supported
- Control Access to Corporate Email by whitelisting devices that are allowed to access the company mail server
- Apply policies to restrict usage and access to features
- Create user and device groups; deploy profiles to targeted audiences in seconds

Monitoring capabilities:

- Capture all diagnostic details regarding hardware, software, configuration and applications
- Watch all devices with real time status to proactively manage your inventory and resources
- Monitor application inventory on devices
- Monitor users and devices on the network that access the company mail server

How do I monitor
devices?

CMDM APPLICATION MANAGEMENT

11

How does application
management work?

Application management options:

- Define recommended and/or mandatory applications
- Push custom in-house or Store applications
- Create company Enterprise application store
- Blacklist prohibited applications and require uninstallation
- Block application for individual users
- Complementary Capabilities: Leverage Comodo Mobile Security, Battery Saver and many more Comodo mobile productivity tools right away

What kind of security is available?

Security features include:

- Enforce passcode and encryption policies to ensure data protection
- Remote locate, lock and wipe (full or selective) functions to keep your data safe
- Integrated Comodo's own patent pending anti-virus engine
- Assign identification and device certificates from trusted Certificate Authority-Comodo
- Data isolation between managed and unmanaged applications

How do I audit devices?

Auditing capabilities:

- Audit your devices for compliance with defined policies
- Access out the of box reports to provide admins with statistics about their deployment
- Audit device, user, system activities, and attempts to access Corporate email

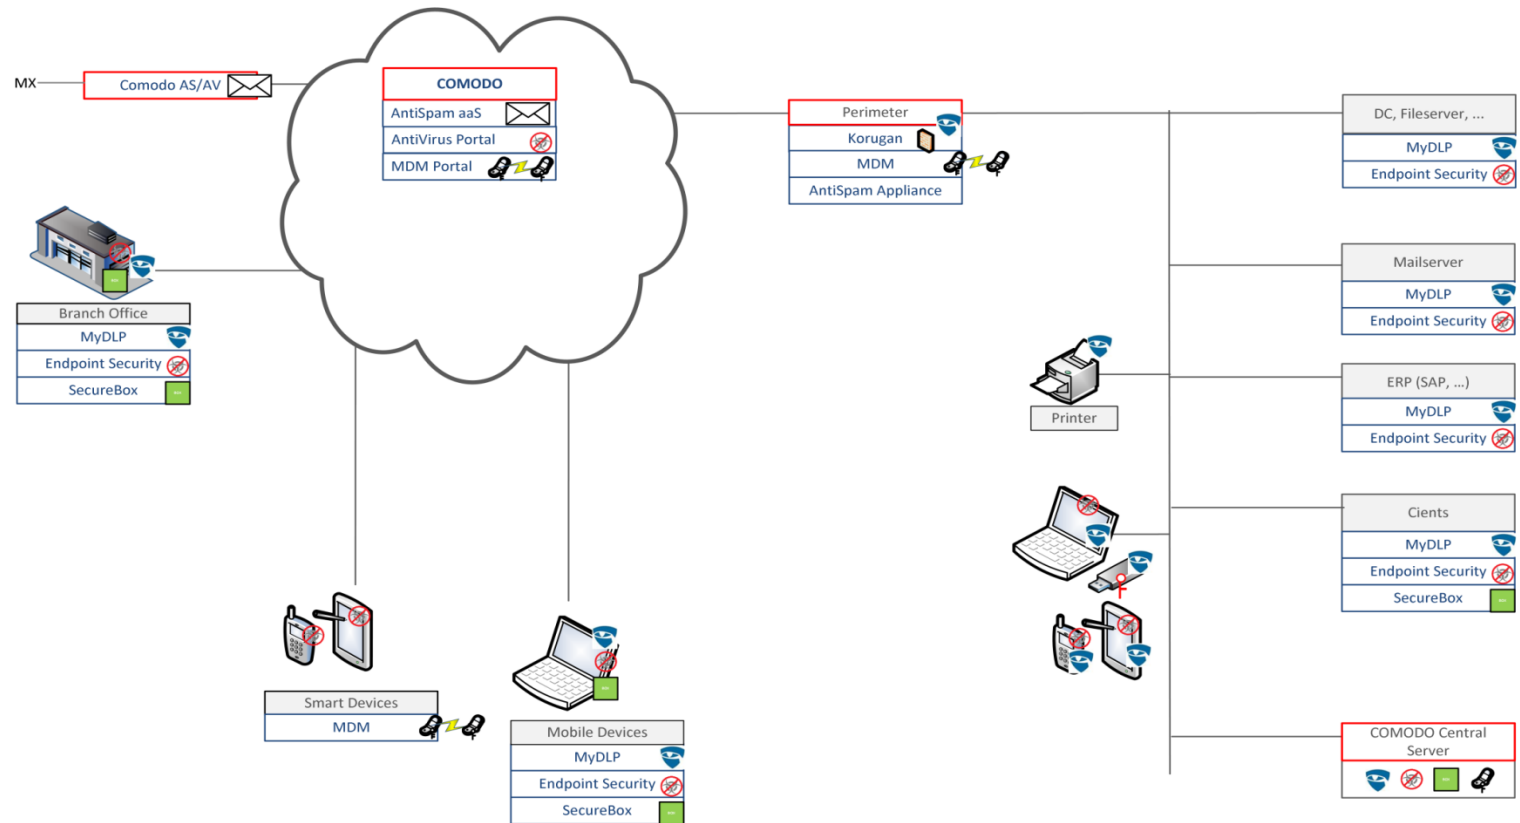

How competitive are you
with iOS?

We are very strong and in line with competition for iOS.

- All restrictions
- All configurations
- Containerization with IOS 7
- Inventory management
- Anti-theft measures (lock, locate, wipe)
- Application Management
